SUPPORT AND TECHNICAL ASSISTANCE POLICY

Routine support is included with your 1-Grid service.

This includes normal assistance with:

- i. Domains and DNS
- ii. Email and mailboxes
- iii. Web hosting
- iv. Dedicated servers
- v. Standard account and service configuration
- vi. Normal troubleshooting
- vii. Faults or errors attributable to 1-Grid

We do not charge customers to correct a fault that is caused by 1-Grid.

Premium customers receive the highest support priority and generally do not incur separate charges for ordinary support relating to their 1-Grid services.

Major projects, bespoke development, extensive migrations, specialist engineering and substantial third-party work may be quoted separately.

Normal business hours:

Monday to Friday, 08:00–17:00, excluding weekends and public holidays. Support outside these hours may attract an after-hours or emergency rate, depending on the nature and urgency of the work. The applicable rate will be communicated to the customer before chargeable work begins wherever reasonably possible.

In exceptional circumstances, waiting for customer approval may cause significantly greater damage, downtime, data loss or security exposure. Where reasonably necessary, 1-Grid may therefore take limited emergency action without prior approval to contain, stabilise or protect the affected service.

Examples may include:

- i. Active malware or security compromise
- ii. Compromised servers or accounts
- iii. Imminent service failure
- iv. Serious resource abuse

- v. Active attacks
- vi. Risk of data loss
- vii. Threats to shared infrastructure or other customers

Any such intervention will be limited to what is reasonably necessary to contain and stabilise the situation. The customer will be notified as soon as reasonably practicable, and the work and time spent will be recorded.

Limitation of Liability: Should a client refuse to authorise an emergency intervention, or fail to pay an emergency invoice resulting in 1-Grid suspending further services, all subsequent operational risks, system failures, data breaches, database corruption, or network wide knock on effects lapse entirely to the client. 1-Grid is absolved of all operational and financial liability for damages arising from client-rejected or unpaid interventions.
